

## Tulsa County Commission's Vision2 tax scheme

VS.

## Sand Springs's money for Sand Springs's vision

13 year, 0.6 cent <u>county</u> sales tax	<u>City</u> sales tax, city choice of rate and duration
Sand Springs gets only \$10 million	Sand Springs could raise at least <b>\$22 million</b> with no overall tax increase (0.6 cent, 13 year city sales tax when Vision 2025 expires)
\$254 million earmarked to <u>bail out</u> AA, City of Tulsa facilities	<u>No Sand Springs tax dollars to bail out</u> AA, City of Tulsa facilities
Uncapped corporate-welfare "deal-closing" fund; Sand Springs council has no say in how it's spent	Sand Springs voters spend Sand Springs's money for Sand Springs's benefit
Sand Springs's share of extra funds is frozen	Money for projects grows as Sand Springs grows
County can veto Sand Springs projects	Sand Springs voters have full control over projects
Hastily thrown together list of projects designed for short-term political gain; no strategic planning	Carefully considered, strategic projects based on city's comprehensive plan and capital improvements plan
Almost \$100 million wasted on interest and bond fees	Pay as you go: No money wasted on interest and bond fees
<b>WRONG FOR SAND SPRINGS</b>	<b>RIGHT FOR SAND SPRINGS</b>

Why are Sand Springs officials giving up \$12 million that could pay for roads, bridges, public safety, parks, and other city needs?
